

LET US JOINTLY
BUILD THE FUTURE

WWW.FAESNOR.COM

LEADER IN TECHNICAL SOLUTIONS FOR THE INDUSTRY

Our commitment is quality, speed, excellent service and compliance with the schedules.

SINCE 1994

We are a metal construction company, specialized in special steels and all types of metal with extensive professional background.

Our location is Murga (Basque Country, Spain), very close to the port of Bilbao, providing a fast and easy shipment of goods.

We offer a high production capacity on a total area of 7.500 m² with a powerful and highly qualified team.

WE COVER THE ENTIRE VALUE CHAIN

Comprehensive 360° management of industrial projects. Trust us and reach extraordinary results.

We assume the entire production process from the customer's drawing to the final delivery of metal components and special welded parts.

We offer continuous support, with all the know-how and the guarantees of a leading company with extensive experience.

Despite working based on structured processes, we have the flexibility to react to changes arising from the needs of our customers. Due to these strengths, we provide tailor-made solutions for all industrial sectors.

GREAT COMPANIES VALUE US

- 💡 We are committed to quality, in time delivery, excellent service and a strict compliance of the schedules.
- 💡 Our strength is the commitment to exceed the expectations of our customers.
- 💡 Due to our excellent reputation for quality and service, 80% of our projects are carried out for the international market.

INDUSTRIAL SERVICES

- We execute based on customer drawings. We optimize them and accelerate the execution time.
- We purchase the necessary material and components according to the specification.
- Cutting of different thicknesses and with the maximum precision.
- Bending, curving and preparation of the parts.
- Union of parts by welding or other processes to obtain products of great quality.
- We have a network of partners specialized in complex machining.

”

We are ISO 3834/2 certified
We ensure the quality of
welding joints, finishing and
resistance of metal
structures.

- Treatment and finishing. Protection against corrosion and stabilizing materials for a perfect finish.
- We advance the assembly in our facilities so that the client can mount the components quickly on site.
- Measurement and functional testing.
- Packing and loading the components so that they arrive at their destination on time and without damage.

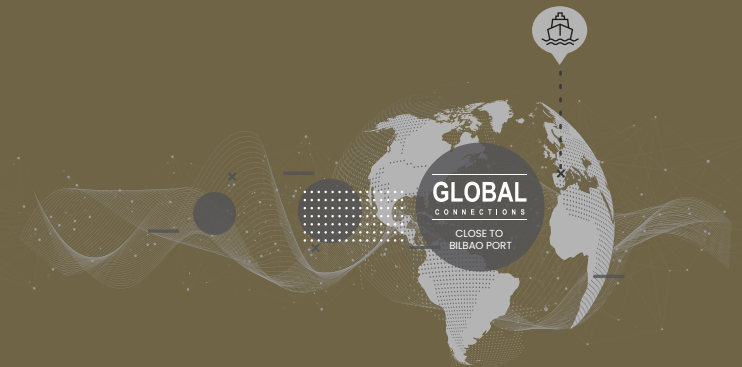

HIGH-PERFORMANCE EQUIPMENT AND TEAM

We dispose of the facilities and a team to achieve the most demanding results.

At Faesnor we are used to challenges that's why we have a highly qualified and motivated team.

Capable to manufacture parts of up to 100 tons and to process material thicknesses up to 200 mm of all types of ferrous and non-ferrous metals.
